Blockchain is software.
It’s as simple as that.
Consensus, not hierarchy
A new way to transact

**Distributed**
Truth and proof are certified by all participants, rather than by a central authority.

**Secure**
The connected and cryptographic nature of the chain makes the ledger secure.

**Transparent**
Allows for equitable and efficient delivery of services like copyright and payments.

Blockchain creates trust in transactions and improves customer relationships.
Blockchain 101

Block 0
- Index: 0
- Timestamp: 17:15 1/1/2017
- Data: blockData
  - hash: 0xe34ad..55
- Previous hash: 0

Block 1
- Index: 1
- Timestamp: 17:17 1/1/2017
- Data: block1data
  - hash: 0xf6e1da2..deb
- Previous hash: 0xe34ad..55

Block 2
- Index: 2
- Timestamp: 17:19 1/1/2017
- Data: block2data
  - hash: 0x932e6d1f..36a21
- Previous hash: 0xf6e1da2..deb
What is value?
Non Fungible Token (NFT)
Smart Contracts
Stacks of apps called dapps
YES
Intellectual Property and Digital Assets
Art
Publishing
Music
MOR.earth

Technology for the Anthropocene
Thank you!
